

National Registry (NREMT) Transition Information

WHAT'S THIS TRANSITION STUFF ALL ABOUT?

In order for NREMTs to maintain National EMS Certification, as outlined in the EMS Education Agenda for the Future, all NREMTs must meet the minimum requirements of knowledge and skills outlined in the National EMS Scope of Practice Model. Transition dates and processes which certified EMS providers must follow to obtain National EMS Certification vary according to the level of EMS provider and are outlined below. It is important to understand that this is an NREMT requirement, along with Nevada EMS regulation.

Per [NRS 450B](#), the deadline for all EMS providers to transition to the new established provider levels is December 31, 2015. This can be accomplished by taking a State of Nevada transition refresher course appropriate to your level of certification as follows:

- EMT-Basic to EMT transition refresher course
- EMT-Intermediate to Advanced EMT transition refresher course
- EMT-Paramedic to Paramedic transition refresher course

Nevada certified EMT-Intermediates and EMT-Paramedics who do not take the appropriate transition refresher course by December 31, 2015 will be downgraded to the EMT level.

EMT-Basics who do not take the appropriate transition refresher course by December 31, 2015 will be decertified.
